

Amendment to the Specification

Please replace para. [0092] in the specification with the following replacement paragraph:

[0092] If, at block 339, it is determined that a download may be initiated, then, at block 331, one or more update packages may be downloaded from device server 219 in the electronic device network 205, and saved in non-volatile memory 101 (see Figure 1) of the mobile handset 207. After download, at block 333, a message may be displayed to the subscriber indicated an opportunity to update firmware and/or software, and a prompt may be provided to solicit subscriber approval. The update agent 131 may be invoked at block 335 to conduct a firmware and/or software update. The mobile handset 207 may register with the electronic device network 205 at block 337, before resuming normal usage at block 343.
